

General Description

The AOZ8S530BLS-03 is a single channel transient voltage suppressor designed to protect data lines or power rails from damaging ESD events.

This device incorporates a bidirectional TVS diode in a single package. During transient conditions, the bidirectional diodes direct the transient to either the positive side of the power supply line or to ground.

The AOZ8S530BLS-03 provides low dynamic resistance and low breakdown voltage make it ideally suited for data lines protections in mobile and computing devices.

The AOZ8S530BLS-03 comes in a RoHS compliant and Halogen Free WLCSP 0.6 mm x 0.3 mm x 0.3 mm package and is rated for -40°C to +125°C junction temperature range.
