

ALPHA & OMEGA
SEMICONDUCTOR

AOD407

**P-Channel Enhancement
Mode Field Effect Transistor**

General Description

The AOD407 uses advanced trench technology to provide excellent $R_{DS(ON)}$, low gate charge and low gate resistance. With the excellent thermal resistance of the DPAK package, this device is well suited for high current load applications.

- RoHS Compliant
- Halogen Free*

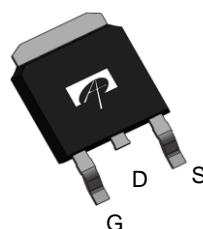

Features

V_{DS} (V) = -60V
 I_D = -12A (V_{GS} = -10V)
 $R_{DS(ON)} < 115\text{m}\Omega$ (V_{GS} = -10V)
 $R_{DS(ON)} < 150\text{m}\Omega$ (V_{GS} = -4.5V)

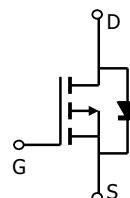

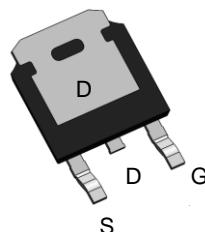

100% UIS tested
100% RG tested

Q_{rr}	Body Diode Reverse Recovery Charge	$I_F=-12\text{A}, dI/dt=100\text{A}/\mu\text{s}$		30		nC

A: The value of R_{QJA} is measured with the device mounted on 1in 2 FR-4 board with 2oz. Copper, in a still air environment with $T_A=25^\circ\text{C}$. The Power dissipation P_{DSM} is based on R_{QJA} and the maximum allowed junction temperature of 150°C . The value in any given application depends on the user's specific board design, and the maximum temperature of 175°C may be used if the PCB allows it.

B. The power dissipation P_D is based on $T_{J(\text{MAX})}=175^\circ\text{C}$, using junction-to-case thermal resistance, and is more useful in setting the upper dissipation limit for cases where additional heatsinking is used.

C. Repetitive rating, pulse width limited by junction temperature $T_{J(\text{MAX})}=175^\circ\text{C}$.

D. The R_{QJA} is the sum of the thermal impedance from junction to case R_{QJC} and case to ambient.

E. The static characteristics in Figures 1 to 6 are obtained using $<300\mu\text{s}$ pulses, duty cycle 0.5% max.

F. These curves are based on the junction-to-case thermal impedance which is measured with the device mounted to a large heatsink, assuming a maximum junction temperature of $T_{J(\text{MAX})}=175^\circ\text{C}$.

G. The maximum current rating is limited by bond-wires.

H. These tests are performed with the device mounted on 1 in 2 FR-4 board with 2oz. Copper, in a still air environment with $T_A=25^\circ\text{C}$. The SOA curve provides a single pulse rating.

*This device is guaranteed green after data code 8X11 (Sep 1ST 2008).
